The City of Sanford, in cooperation with the Towns of Acton and Shapleigh, plans to lower the water level of Square Pond beginning on or about September 25, 2023. The purpose of lowering the water earlier than normal is to allow for a culvert replacement on West Shore Drive in Acton. The water will be lowered to the normal winter pool level with the intent that winter level be achieved by October 3. Residents and recreational users should remove their watercraft and docks. Boating activity is discouraged after October 3 due to the increased number of unmarked underwater hazards. For more information about the culvert replacement project, please contact Acton Town Hall at 207-636-3131 extension 401.
